**Thank God for the Atom Bomb, and Other Essays** Paul Fussell, 1990 This is not a book to promote tranquility and readers in quest of peace of mind should look elsewhere writes Paul Fussell in the foreword to this original sharp tart and thoroughly engaging work The celebrated author focuses his lethal wit on habitual euphemizers artistically pretentious third rate novelists sexual puritans and the Disneyfiers of life He moves from the inflammatory title piece on the morality of dropping the bomb on Hiroshima to a hilarious disquisition on the naturist movement to essays on the meaning of the Indy 500 race on George Orwell and on the shift in men s chivalric impulses toward their mothers Fussell s frighteningly acute eye for the manners mores and cultural tastes of Americans The New York Times Book Review is abundantly evident in this entertaining dissection of the enemies of truth beauty and justice

Japan's Decision For War In 1941: Some Enduring Lessons Dr. Jeffrey Record, 2015-11-06 Japan s decision to attack the United States in 1941 is widely regarded as irrational to the point of suicidal How could Japan hope to survive a war with much less defeat an enemy possessing an invulnerable homeland and an industrial base 10 times that of Japan The Pacific War was one that Japan was always going to lose so how does one explain Tokyo s decision Did the Japanese recognize the odds against them Did they have a concept of victory or at least of avoiding defeat Or did the Japanese prefer a lost war to an unacceptable peace Dr Jeffrey Record takes a fresh look at Japan s decision for war and concludes that it was dictated by Japanese pride and the threatened economic destruction of Japan by the United States He believes that Japanese aggression in East Asia was the root cause of the Pacific War but argues that the road to war in 1941 was built on American as well as Japanese miscalculations and that both sides suffered from cultural ignorance and racial arrogance Record finds that the Americans underestimated the role of fear and honor in Japanese calculations and overestimated the effectiveness of economic sanctions as a deterrent to war whereas the Japanese underestimated the cohesion and resolve of an aroused American society and overestimated their own martial prowess as a means of defeating U S material superiority He believes that the failure of deterrence was mutual and that the descent of the United States and Japan into war contains lessons of great and continuing relevance to American foreign policy and defense decision makers

Kamikaze Diaries Emiko Ohnuki-Tierney,2007-03-01 We tried to live with 120 percent intensity rather than waiting for death We read and read trying to understand why we had to die in our early twenties We felt the clock ticking away towards our death every sound of the clock shortening our lives So wrote Irokawa Daikichi one of the many kamikaze pilots or tokkotai who faced almost certain death in the futile military operations conducted by Japan at the end of World War II This moving history presents diaries and correspondence left by members of the tokkotai and other Japanese student soldiers who perished during the war Outside of Japan these kamikaze pilots were considered unbridled fanatics and chauvinists who willingly sacrificed their lives for the emperor But the writings explored here by Emiko Ohnuki Tierney clearly and eloquently speak otherwise A significant number of the kamikaze were university students who were drafted and forced to volunteer for this desperate military operation Such young men were the intellectual elite of modern Japan steeped in the classics and major works of philosophy they took Descartes I think therefore I am as their motto And in their diaries and correspondence as Ohnuki Tierney shows these student soldiers wrote long and often heartbreaking soliloquies in which they poured out their anguish and fear expressed profound ambivalence toward the war and articulated thoughtful opposition to their nation s imperialism A salutary correction to the many caricatures of the kamikaze this poignant work will be essential to anyone interested in the history of Japan and World War II

**American Signal Intelligence in Northwest Africa and Western Europe** George Howe,2012-08-01 The volume at hand Dr George F Howe s American Signals Intelligence in Northwest Africa and Western Europe is important professional reading for those interested in cryptologic history or in World War II Dr Howe s book deals primarily with organizational matters for providing SIGINT support in combat Thus the reader will not find stories of high level cryptanalysis underlying big decisions by famous leaders In my estimation by concentrating on the less flashy aspects of wartime support in favor of the background work Dr Howe has again added a dimension of great worth to our knowledge of SIGINT and of the war The study of World War II SIGINT has concentrated by and large on ULTRA the exploitation of high grade cryptographic systems used by Germany and Japan and the use of ULTRA material by senior wartime decision makers This effort unquestionably is important for understanding the decisions and events of that terrible era but the overwhelming focus on this aspect has resulted in a slightly skewed understanding The production of ULTRA and its effective use depended on a strong and well organized structure working in conjunction with now legendary cryptanalysts Since the distribution of ULTRA was limited to a small number of officers and civilian leaders the bulk of SIGINT support to the warfighter cam from tactical SIGINT units working at or near the front lines This is an important subject for understanding what happened in World War II and for studying the principles of SIGINT organization today United State Cryptologic History Sources in Cryptologic History National Security Agency

The United States, China, and Taiwan Robert Blackwill, Philip Zelikow, 2021-02-11 Taiwan is becoming the most dangerous flash point in the world for a possible war that involves the United States China and probably other major powers warn Robert D Blackwill Council on Foreign Relations CFR Henry A Kissinger senior fellow for U S foreign policy and Philip Zelikow University of Virginia White Burkett Miller professor of history In a new Council Special Report The United States China and Taiwan A Strategy to Prevent War the authors argue that the United States should change and clarify its strategy to prevent war over Taiwan The U S strategic objective regarding Taiwan should be to preserve its political and economic autonomy its dynamism as a free society and U S allied deterrence without triggering a Chinese attack on Taiwan We do not think it is politically or militarily realistic to count on a U S military defeat of various kinds of Chinese assaults on Taiwan uncoordinated with allies Nor is it realistic to presume that after such a frustrating clash the United States would or should simply escalate to some sort of wide scale war against China with comprehensive blockades or strikes against targets on the Chinese mainland If U S campaign plans postulate such unrealistic scenarios the authors add they will likely be rejected by an American president and by the U S Congress But they observe the resulting U S paralysis would not be the result of presidential weakness or timidity It might arise because the most powerful country in the world did not have credible options prepared for the most dangerous military crisis looming in front of it Proposing a realistic strategic objective for Taiwan and the associated policy prescriptions to sustain the political balance that has kept the peace for the last fifty years the authors urge the Joe Biden administration to affirm that it is not trying to change Taiwan s status work with its allies especially Japan to prepare new plans that could challenge Chinese military moves against Taiwan and help Taiwan defend itself yet put the burden of widening a war on China and visibly plan beforehand for the disruption and mobilization that could follow a wider war but without assuming that such a war would or should escalate to the Chinese Japanese or American homelands The horrendous global consequences of a war between the United States and China most likely over Taiwan should preoccupy the Biden team beginning with the president the authors conclude
